RING SIZING GUIDE

Please note, this Ring Sizing Guide is just a reference. The wider the ring style, the more snug the fit.
For best results, we will send you our ring sizing kit upon placing your order.

1. PRINT AND MEASURE FOR ACCURACY

Before printing, make sure printer settings are set to print to "100%" or "Actual Size". They should NOT be set to "Fit to Page" (common default).
After printing, compare the key (right) with a ruler to verify accuracy.

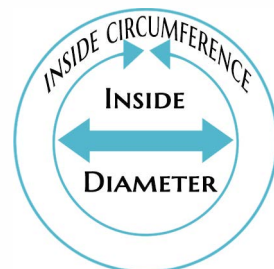

2. MEASURE YOUR FINGER CIRCUMFERENCE

Wrap a measuring tape no wider than 2cm around the circumference of your finger to determine a basic finger size. Make sure it slides easily over the knuckle. Avoid measuring fingers that are too warm or cold, and avoid using fine string that could fall too closely into the contours of your finger. Match your finger measurement to the inside circumference of the guide below.

3. MEASURE YOUR RING DIAMETER

To find your size using a ring that fits, place it over the guide below. Rings inside wall should match the inside diameter of the appropriate blue circle.
Please note, the wider the ring style, the more snug the fit.
